

KOMEX-FLEX-M13

Water as a basis.

Together with green energy, it is the foundation for our natural weed control systems. The compact design of our devices makes them suitable for a wide range of applications.

WEED REMOVAL

CLEANING

WATERING
PLANTS

GUM REMOVAL

DISINFECTION

NEW

Additional option:

The new high-pressure module with 48 V and a lithium battery for even more power.

- ✓ Max. 100 bar at 13 l/min:
approx. 1.5 hours of runtime
at full power
- ✓ e.g. at 50 bar with 13 l/min:
more than 2.5 hours of
continuous operation
- ✓ Low-pressure applications
(weeds/brushes):
more than 10 hours of
continuous operation

Natural. Effective. Modular.

KOMEX-FLEX-M13

Art. no.: KS-000-023

TECHNICAL DATA

Drive	Battery powered, up to 8 h of continuous operation
Power supply	12 V DC, 260 Ah
Power consumption	28–33 A
Volume	< 79 dB, can be used anywhere without noise pollution
Steam temperature	100–130 °C, depending on accessories
Fuel tank	Quick-change system for 20 l metal canisters
Fuel consumption	approx. 4–9.5 l/h, depending on switch-on duration
Water pump	11–13 l/min, self-priming, option to draw in water from external water tanks
Operating panel and control system	Digital
Basic dimensions	L x W x H: 97 cm x 78 cm x 104 cm
Dry weight	270 kg
Accessories	Detachable hand lances, steam hose
Optional accessories	Remote control, trolley, three-point frame for tractor mounting, and much more
Special features	Direct water connection possible, can be moved by fork-lift truck, steam hose with a length of up to 40 m

SUITABLE FOR

- ✓ All carrier vehicles with a water tank
- ✓ Trailers with a water tank
- ✓ Vehicles with a three-point mount and water tank

AREAS OF APPLICATION

- ✓ Municipalities/councils: For service provision and taking care of public institutions, parks, cemeteries, schools, play parks and sports fields, company premises, commercial buildings, water protection zones, paths, yards of residential and public buildings, and much more
- ✓ Controlling invasive plant species, e.g. Japanese knotweed
- ✓ Cleaning road signs, etc.

The **KECKEX method** is the most efficient method for natural weed removal. A hot water/steam mixture ensures that weeds are not just removed from the treated surface, but tackled right at the roots.

50% steam acts on the surface

50% hot water targets the root system

Scalding of the stem

Destruction of the chlorophyll

Destruction of the roots

Number of applications
